Summary

Android Developer with 3+ years of experience in designing and developing mobile applications using Kotlin, Jetpack Compose, and Kotlin Multiplatform (KMP). Passionate about building scalable, high-performance applications with modern Android architectures (MVVM, Clean Architecture). Experienced in integrating third-party services, optimizing app performance, and integrating secure APIs. Seeking an opportunity to leverage expertise in Compose and KMP.

A person with a good ability to find & resolved problems, implementing innovative & value-driven software solutions, also have reliable decision-making capacity. Made for creating software solutions. With a keen focus on learning new technologies and industry trends. Skilled in analyzing and resolving complex issues across all environments, including high-pressure production environments.

Let's connect and discuss the opportunities and capabilities, I believe I have something that you are expecting.

Technical Skills

- **Languages & Frameworks:** Kotlin, Jetpack Compose, KMP (Kotlin Multiplatform), XML, Material3
- **Android Development:** Jetpack Compose, Jetpack components lifecycle, navigation etc. Coroutines, Flow, LiveData, Room DB, Navigation Component an google map API integration.
- **Architectures & Patterns:** MVVM, MVI, Clean Architecture, Repository Pattern.
- **Background Taks :** Work Manager, background service
- **Networking & APIs:** Retrofit, OkHttp3, Ktor.
- **Dependency Injection:** Hilt, Dagger2, Koin.
- **Cloud & Storage:** Android Shared Preference, DataStore, Firebase, AWS S3, AWS SDK, Shared Preferences, SQLite, PostgreSQL.
- **Build Tools:** Gradle (Groovy & Kotlin), CI/CD (GitHub Actions, Jenkins), Gradle Task.
- **Publish and Update:** App publishing and update in Playstore.
- **Version Control & Collaboration:** Git, GitHub.

Work Experience

Android Developer (Aug 2021 – Present)

Logic Soft Pvt. Ltd. | Chennai, India

➤ Key Responsibilities:

- Led the Android development efforts, managing the complete app lifecycle from design to deployment.
- Independently handled all Android projects between three months, resolving critical production issues, debugging, and feature enhancements.
- Designed and developed applications using Jetpack Compose, Kotlin, Ktor and KMP (Kotlin Multiplatform) to target both Android and Desktop platforms.
- Optimized application performance, reducing memory leaks and improving UI responsiveness by replacing RecyclerView with LazyColumn.
- Developed scalable API integrations using Retrofit and Ktor, ensuring efficient data communication.
- Owned the release cycle, handling APK generation, signing, and distribution for testing and production environments.
- Implemented CI/CD pipelines using Jenkins, automating build processes and reducing manual effort.
- Collaborated with backend teams, designers, and QA to ensure seamless functionality across applications.
- Publishing and Maintaining the Applications in the Playstore.
- Mentored and guided a new Android developer, providing knowledge transfer and best practices for maintainable code.

➤ Notable Achievements:

- Migrated XML-based UI to Jetpack Compose, eliminating third-party UI libraries, simplifying complex UI implementations, and improving app performance.
- Created Dashboard app in targeting Android and Desktop using KMP. Including Ktor for API integration.
- Resolved memory crashes in large data synchronization, implementing a packet-based JSON processing approach using WorkManager for schedule the sync, reducing sync time from 10 minutes to 3 minutes by this approach.
- Created representative tracking app using the Google Map API.
- Developed an internal App Store using AWS S3, streamlining app distribution and eliminating Play Store dependencies for internal apps.
- Automated APK distribution using Jenkins, allowing testers and stakeholders to self-fetch builds, improving development workflow efficiency.

- Enhanced UI performance by replacing RecyclerView with LazyColumn, reducing memory consumption and improving smooth scrolling.

➤ **Technology Used:**

Languages & Frameworks: Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP)

Dependency Injection: Dagger2 Hilt and Koin

Backend & APIs: Retrofit, Ktor

Database & Storage: Room DB, AWS S3

Build & Automation: Gradle, Jenkins

Personal Projects

SpendSmart – Personal Finance Tracker

- Developed a finance management app using Jetpack Compose, enabling users to track income and expenses seamlessly.
- Implemented a monthly budgeting feature, allowing users to set spending limits and monitor financial goals.
- Designed an intuitive UI with Material 3, ensuring a modern and smooth user experience.
- Utilized Room Database for storing transactions and budget details efficiently.
- Optimized app performance and state management using Kotlin coroutines and Flow.
-  **GitHub:** [github.com/aravindhan182/spend smart](https://github.com/aravindhan182/spend-smart)

My portfolio – Cross-Platform Developer Portfolio

- Built a personal portfolio website and app using Kotlin Multiplatform (KMP), targeting Web Application.
- Showcased skills, projects, and experience in a responsive, minimal UI designed with Jetpack Compose.
-  **GitHub:** github.com/aravindhan182/myportfolio

Education

Mahath Amma Institute of Engineering and Technology, Pudukkottai, Tamilnadu.

Bachelor of Engineering in Computer science Engineering. (2017-2021)

Govt HSS, Maramadakki, Tamilnadu.

Higher Secondary Education, Biology Mathematics (2015-2017)

Languages

Tamil, English
