Summary

Android Developer with 3.5 plus years of experience in designing and developing mobile applications using Kotlin, Jetpack Compose, and Kotlin Multiplatform (KMP). Passionate about building scalable, high performance applications with modern Android architectures (MVVM, Clean Architecture). Experienced in integrating third-party services, optimizing app performance, and integrating secure APIs. Seeking an opportunity to leverage expertise in Compose and KMP. A person with a good ability to find & resolve problems, implementing innovative & value-driven software solutions, also have reliable decision-making capacity. Made for creating software solutions. With a keen focus on learning new technologies and industry trends. Skilled in analysing and resolving complex issues across all environments.

Skills

- **Programming Languages & Frameworks:** Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP)
- **Architectural Patterns:** MVVM, MVI, Clean Architecture
- **UI Development:** Jetpack Compose, XML
- **Database Management:** Room, SQLite, PostgreSQL
- **Networking & APIs:** Retrofit, OkHttp3, Ktor
- **Dependency Injection:** Hilt, Dagger2, Koin
- **Background Processing:** WorkManager, Background Services
- **Cloud & Storage:** AWS S3, Firebase
- **Tools:** Android Studio, DBeaver, DB browser, Postman, Notion
- **Testing & Optimization:** JUnit, Performance Tuning, Memory Leak Fixes
- **Version Control & Collaboration:** Git, GitHub
- **App Deployment:** Google Play Store Publishing & Updates, Jenkins

Education

Mahath Amma Institute of Engineering and Technology, Pudukkottai, Tamilnadu.

Bachelor of Engineering in Computer science Engineering. (2017-2021)

Govt HSS, Maramadakki, Tamilnadu.

Higher Secondary Education, Biology Mathematics (2015-2017)

Work Experience

Android Developer (Aug 2021 – Present)

Logic Soft Pvt. Ltd. | Chennai, India

Key Responsibilities:

- Spearheaded end-to-end Android development for 5+ projects, ensuring timely delivery, quality, and maintainability.
- Independently managed 4+ Android apps over a 3-month period, resolving production issues and shipping feature updates with improved user feedback.
- Built cross-platform applications using Jetpack Compose, Kotlin, Ktor, and KMP, reducing development time by 30% and code duplication by 40% between Android and Desktop platforms.
- Developed cross-platform applications using Kotlin Multiplatform (KMP), Jetpack Compose, and Ktor, ensuring shared codebase efficiency between Android and Desktop.
- Integrated and maintained 10+ backend APIs using Retrofit and Ktor, enhancing app stability and responsiveness.
- Upgraded legacy apps to support Android 13+, improving compatibility and reducing crash rates across user devices.
- Collaborated with cross-functional teams (backend, design, QA) for seamless app delivery, feature alignment, and issue resolution.
- Published and maintained 4+ apps on the Google Play Store, including release management, analytics, and user support.
- Mentored and guided a new Android developer, providing knowledge transfer and best practices for maintainable code.

Notable Achievements:

- **Modernized UI architecture** by migrating from XML to Jetpack Compose, removing dependency on third-party UI libraries and boosting rendering performance.
- **Reduced sync time by 70%** in a data-heavy app by implementing packet-based JSON processing with WorkManager for scheduled synchronization tasks.
- **Created a cross-platform dashboard app** targeting both Android and Desktop using Kotlin Multiplatform, optimizing development efforts.
- **Improved release pipeline** by implementing Jenkins-based CI/CD automation, decreasing manual intervention and speeding up deployments.
- **Built a Google Maps-powered tracking app** to visualize representative locations in real-time, increasing operational transparency.
- **Developed an internal app distribution platform** using AWS S3, eliminating reliance on the Play Store for internal testing and deployments.
- **Streamlined APK distribution** by automating build uploads in Jenkins, enabling testers and stakeholders to self-download the latest versions.
